

To Whom It May Concern:

Reject the NAB petition 04-160. I know too many people who rely on satellite radio for the majority of their radio listening. It would be a grave public disservice to keep these people from being informed about weather and traffic information. The NAB's petition is a clear attempt to use governmental regulatory agencies to offset the NAB memberships inability to compete in the marketplace. Don't let them use you as patsies for their agenda.

Sincerely,

Joe Williams
